

SAP next-gen

A photograph of a person from behind, wearing a bright red jacket and black pants, standing on a rocky ledge. They have their arms outstretched wide, embracing the view. In front of them is a vast, rugged mountain range with several peaks, some of which are partially covered in snow. The sky above is a clear, pale blue with a few wispy clouds.

Coursera Professional Certificate SAP Technology Consultant

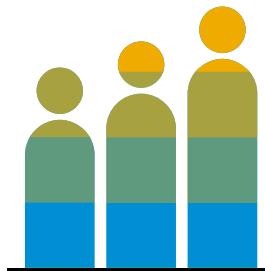

SAP Technology Consultant

SAP produces software for the management of business processes, developing solutions that facilitate effective data processing and information flow across organizations. Our mission is to aid organizations in becoming genuinely Intelligent Enterprises.

SAP is a global company, and as such career opportunities are also truly global.

The pace of change in the IT industry means that there is a constant flux in the range and types of skills that are in demand. Combine this with SAP's scale, the scale of the SAP ecosystem and the many, many SAP customers around the world and it becomes clear that there is huge demand for those with SAP skills and qualifications.

The Coursera Professional Certificate: SAP Technology Consultant was created jointly by SAP and Coursera as a program to rapidly build knowledge in the core skills all SAP Consultants need

regardless of where they are in their careers. It gives you an overview of SAP, the SAP ecosystem, SAP products and how they are integrated as well as guiding you through which 'soft' consulting skills are most often cited as in high demand.

In addition it will take you through some of the most typical processes a SAP Consultant undertakes as part of a consulting project. You will get the chance to study projects, and then be given the chance to examine how you would manage two of your own projects - in sustainable energy and global food security.

Finally there will be a wealth of career guidance resources to help you wherever you may be on the SAP career path. The course assumes no knowledge of SAP or of consulting.

This booklet is a guide to the many additional resources available to you as you progress through the Coursera SAP Technology Consultant Professional Certificate and how you can join the SAP family.

We hope you find the course to be fun, engaging and rewarding.

Martin Gollogly, Coursera Program Director, SAP: LinkedIn

Learning support for Coursera students

What SAP resources are available to support my Coursera learning?

SAP has long had a tradition of providing opportunities for self-directed learning as well as opportunities for connecting to other SAP consultants and those using SAP in their day to day lives.

SAP today is at the forefront of online self-directed learning with our platform the [SAP Learning Site](#) - and [the student zone on the SAP learning site](#) a fully online immersive learning platform that enables you to take control of your own learning journey.

To take advantage of the SAP Learning site you can just visit the site and begin exploring. There are no fees and no qualification requirements. Just visit, explore, and learn.

Within your Coursera studies you will find a number of links to learning. sap.com and to additional SAP online learning resources such as [www.opensap.com](#).

Communities

SAP also has a long-standing tradition of building communities for SAP consultants, customers, students, academics, or just those wishing

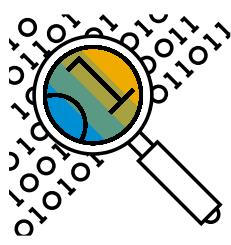

to know more about the company and our ecosystem. SAP itself has the [SAP Community](#) - a network of millions of people that share ideas, ask questions, and provide support to each other.

We also have the SAP Next-Gen Community - this program supports university students, high-schoolers and self-directed learning students across the world. One of the aspects of the SAP Next-Gen Program is the University Alliances community. Another is the Young Thinkers program. We also have a large and growing community on our SAP Next-Gen LinkedIn page which is open to all Coursera students - if you would like to join and connect you would be very welcome - visit us [here](#).

Certification opportunities

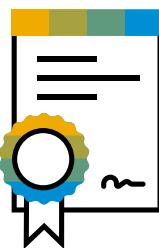

SAP has a vast variety of self-paced learning journeys leading to SAP Certifications. These are distinct from the Coursera SAP Professional Certificate and are wholly and exclusively designed and hosted by SAP. The Courswra course is design to provide an introduction into SAP solutions and guidance on where you would like to focus in your future studies. If you would like to explore further SAP Certifications you can take a look [here](#) to find out more.

SAP Learning site

SAP Next-Gen

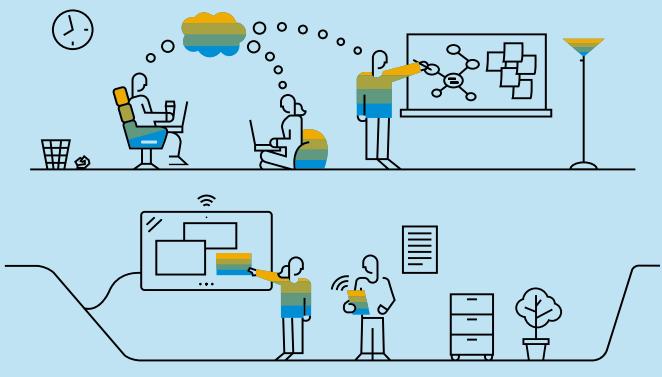

SAP Certification

SAP Learning Site

A

Open to anyone

The SAP Learning site enables learners to quickly upskill or reskill in key innovation areas, for free. Designed to be simple and intuitive, it provides access to SAP Learning Journeys that learners can follow to upskill and prepare for SAP certifications. Students can learn in a dedicated student zone on the site with tailored learning contents.

B

SAP learning resources

All SAP Learning site courses have been designed and built by SAP itself as official learning materials. That means they represent the best knowledge and experience that SAP has to offer and are the best route to developing your own SAP skillset.

C

Learning journeys

Learning journeys take you through the process of learning a specific topic in an easy-to-follow step-by-step **journey** that enables you to follow the course in sequence. Or, if you'd prefer, you can step ahead to topics that are of particular interest to you. Learning is a journey.

D

Multiple media

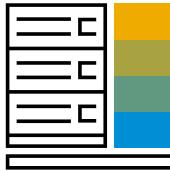

The SAP Learning site offers students a multi-media, multi-format route to learning so that there is always a medium to capture your interest. It offers a variety of teaching methods including video, short-form descriptions, multiple-choice questions and answers and easy to understand diagrams and graphics.

E

Use with Coursera

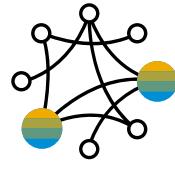

The SAP Learning site is a perfect source for additional learning once you have been exposed to a specific concept during your Coursera studies. You can understand the initial concepts through Coursera, and if you find that a specific topic interests you, you can then take that interest further and study things like SAP Analytics Cloud, Signavio or Business Technology Platform in greater depth.

SAP Learning Journeys on the SAP Learning site

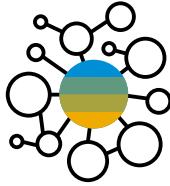

Getting started with UX

After completing this learning journey, developers will be able to build a simple user interface using HTML, CSS, and JavaScript.

Discover SAP Business Technology Platform

This learning journey provides you with an introduction to SAP Business Technology Platform and the Intelligent Enterprise strategy.

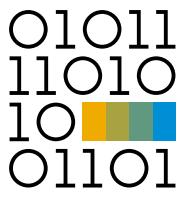

Run SAP Business Processes with SAP Signavio Solutions

This learning journey will guide you through the fundamentals of our SAP Signavio solutions and business process management.

Explore RISE with SAP S/4HANA Cloud

This learning journey is designed for you to explore RISE with SAP and each deployment option available with the RISE with SAP offering.

Utilize Low-Code/No-Code Applications and Automations for Citizen Developers

In this learning journey you will learn about the basic concepts of low-code/no-code software development and how to build your own apps.

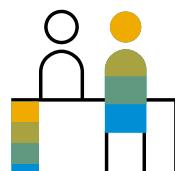

Explore SAP Analytics Cloud

This learning journey will introduce you to the different parts of SAP Analytics Cloud, including many demonstrations.

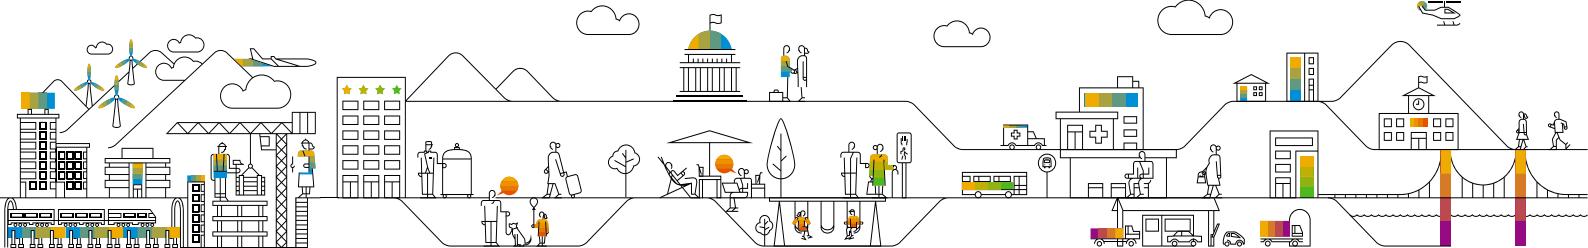

Design Business Processes with SAP Signavio Solutions

This learning journey will guide you through the tasks involved specifically in the designing of business processes with SAP Signavio solutions.

Explore SAP SuccessFactors Solutions

This learning journey will explore the concepts and capabilities of the solutions within the SAP SuccessFactors suite.

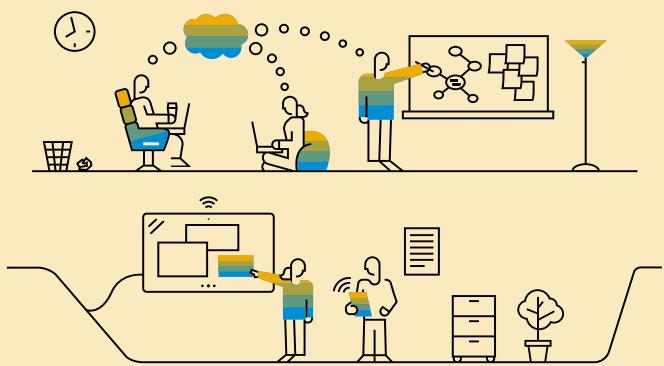

Additional resources

A

openSAP

openSAP is the Massive Online Open Course (MOOC) for SAP. Massive Open Online Courses (MOOCs) leverage tried and trusted classroom concepts, with digital enhancements including gamification and discussion forums, to interact with other learners and experts in an online delivery format.

D

SAP User Groups

SAP User Groups are found around the world and represent a forum for partners and customers to come together to share the latest updates on the SAP ecosystem, including opportunities for learning and careers. You can find your most local SAP User Group [here](#).

B

SAP Next-Gen LinkedIn

The SAP Next-Gen program created a community page for students to reach out and connect with each other on the LinkedIn platform [here](#). As a Coursera student you are very welcome to connect with us to keep up with the latest posts as well as to network and share your experiences.

C

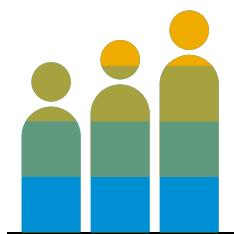

SAP Community

SAP has built a large community that you can join called the **SAP Community**, with over 3 million members interested in SAP topics. Here you can read news, blogs, articles on SAP products (and resources and careers). You can network, build your SAP knowledge and ask questions in the various groups.

E
